ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: A CUTTING TOOL AND A TOOL PART WITH CONNECTING SURFACES WITH GROOVES AND A METHOD
FOR MANUFACTURING OF THE TOOL PART

(57) Abstract: The invention relates to a cutting tool of the type that comprises two parts (1, 2) having co-operating connecting surfaces of serration type, which individually include a plurality of ridges or tops (13, 15), which are mutually separated by grooves (14, 16), the pitch (P) between the ridges in the respective connecting surfaces being one and the same. According to the invention, the widths of two or more grooves (14) positioned one after the other in a series in one of the connecting surfaces increase progressively from a first groove (14a) to a last groove (14) in the series. Furthermore, the invention relates to a tool part as such, as well as a method in the manufacture of such tool parts.
